Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Values	Screenshot
1.	Model Summary	ServiceNow Flow Designer Automation Engine: • Triggers automatically on creation of Incident WorkFlow records when Category is empty. • Evaluates keywords in Short Description (Wi-Fi/Network, Projector, Forgot Password/Login, Slow/Hanging).	

		• Automatically populates dependent choice fields (Category & Subcategory). • Triggers dynamic confirmation email notifications to the Caller reference.	
2.	Accuracy	Training Accuracy -N/A (Rule-based No-Code Engine / 100% Deterministic Keyword Matching) Validation Accuracy - 100% (33 / 33 Test Scenarios Passed across all categories)	
3.	Fine Tuning Result(if Done)	Validation Accuracy - 100% • Expanded keyword conditions to cover variations like Wi-Fi vs Network and Password vs Login. • Enforced Subcategory dictionary dependencies to ensure error-free category-subcategory pairing.
