

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	01 October 2026
Team ID/STUDENT NAME	PRIYADHARSHINI S
Project Name	Auto Ticket Classification Using Flow Designer
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIN
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	Automatic Ticket Categorization	Short Description Keyword Analysis Automatic Assignment of Category Automatic Assignment of Subcategory
FR-4	Dynamic Choice Mappings & Email Notification	Field Dependency Logic Configuration Automated Confirmation Email to Caller Update Set Tracking & Export

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Simple, no-code UI for students/teachers to submit requests by entering only Caller Name and Short Description without needing to know category choices.
NFR-2	Security	Access control managed via standard ServiceNow Role-Based Access Controls (RBAC), ensuring only authorized IT staff and system flows update ticket categories.
NFR-3	Reliability	Guaranteed accuracy in ticket tagging based on predefined keyword triggers, preventing manual tagging errors and lost tickets.
NFR-4	Performance	Flow execution triggers immediately on record insertion, updating fields and firing automated emails in under 2 seconds.
NFR-5	Availability	High system uptime hosted on ServiceNow cloud infrastructure, providing 24/7 availability for students and teachers to submit IT requests
NFR-6	Scalability	Modular flow design allowing easy additions of new keywords, new categories/subcategories, assignment groups, or SLA rules in future phases.
