

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	01 October 2026
Team ID	PRIYADHARSHINI S
Project Name	Auto Ticket Classification Using Flow Designer
Maximum Marks	4 Marks

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

Functional Requirements

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR -1	User Registration DOCX	Registration through Gmail Registration through LinkedIN DOCX
FR-2	User Confirmation	Confirmation via OTP

	DOCX	DOCX
FR-3	Automatic Ticket Categorization	Short Description Keyword Analysis Automatic Assignment of Category Automatic Assignment of Subcategory Dependency Logic Configuration Field
FR -4	Dynamic Choice Mappings & Email Notification	Automated Confirmation Email to Caller Update Set Tracking Export

Non-functional Requirements

Following are the non-functional requirements of the proposed solution.

NFR NO.	Non-Functional Requirement	Description
NFR-1	Usability DOCX	Simple, no-code UI for students/teachers to submit requests by entering only Caller Name and Short Description without needing to know category choices.
NFR-2	Security DOCX	Access control managed via standard ServiceNow Role-Based Access Controls (RBAC), ensuring only authorized IT staff and system flows update ticket categories.
NFR-3	Reliability DOCX	Guaranteed accuracy in ticket tagging based on predefined keyword triggers, preventing manual tagging errors and lost tickets.
NFR-4	Availability DOCX	High system uptime hosted on ServiceNow cloud infrastructure, providing 24/7 availability for students and teachers to submit IT requests.

NFR NO.	Non-Functional Requirement	Description
NFR-5	Performance DOCX	Flow execution triggers immediately on record insertion, updating fields and firing automated emails in under 2 seconds.
